ADDICTED TO PLASTIC is a feature-length documentary about solutions to plastic pollution. The point-of-view style documentary encompasses three years of filming in 12 countries on 5 continents, including two trips to the middle of the Pacific Ocean where plastic debris accumulates. The film details plastic's path over the last 100 years and provides a wealth of expert interviews on practical and cutting edge solutions to recycling, toxicity and biodegradability. These solutions - which include plastic made from plants - will provide viewers with a hopeful perspective about our future with plastic.
